How do i allow this soundtrack? it doesnt change anything after i buy and download it .. any help ?. This soundtrack is a great example of the incredible talent put into the soundtracks in the Monster Hunter series. Not only is the dramatic music enough to always get your blood pumping, but for the hunter who has actually played the game, each song carries with it emotions and memories of great hunts with friends or strangers that regardless share with you the bond of being a monster hunter. Anyone who's invested a lot of time into Monster Hunter: World ought to get this soundtrack, and relive all their greatest hunting moments just from the music alone. **The only drawback is that this soundtrack has not been updated to include the new tracks added to the main game through content updates. It is missing music for Deviljho, Kulve Taroth, Lunastra, Behemoth, and Arch-Tempered Kulve Taroth.**
